## EDUCATION

### Cambridge Institute of Technology

*Master of Computer Applications*

Bangalore, India

Nov 2023 - Oct 2025

**CGPA: 8.7**

### Global College of Management studies

*Bachelor of Computer Applications*

Hosakote, India

Nov 2020 - Sept 2023

**CGPA: 8.7**

## TECHNICAL SKILLS

**Languages:** C/C++, SQL, HTML/CSS, JavaScript, Java

**Frameworks:** Reactjs,

**Tools:** Linux, Git, IntelliJ

**API Technologies:** RESTful APIs, Postman, Thunder Client

**Soft Skills:** Fast learner, Team collaboration, Problem-solving, Growth Mindset, Team Player

## PROFESSIONAL EXPERIENCE

### Software Engineering Intern

*Truerize IQ Strategic Solutions Pvt Ltd*

Sept 2025 – Dec 2025

Bangalore, India

- Worked on a live Exam Portal project as part of the internship program
- Contributed to frontend development using React.js and backend integration with MySQL
- Contributed to Backend using java spring boot

## PROJECTS

### Exam Portal – Live Project | *React.js, Mysql, Javascript*

Nov 2025

- Live URL: <https://app.truerizetalent.com/>
- Developed and contributed to a live online examination portal with role-based access for Admin and Students, deployed and actively used in real scenarios
- Implemented an exam management system allowing students to attempt assessments within defined sessions and time constraints
- Built a comprehensive Admin Dashboard to manage users, create exams, and monitor overall platform activity.
- Integrated bulk and individual email notification system, allowing admins to send exam invites, alerts, and result notifications directly to students.
- Enabled real-time result evaluation and tracking, allowing admins to view student performance and exam outcomes instantly.
- Worked on end-to-end exam lifecycle, including quiz creation, exam participation, result processing, and communication.

### Pet Care Learning Platform | *React, Node.js, MongoDB*

Aug 2025

- Developed a Pet Care Learning Platform using React.js, Node.js, and MongoDB to provide pet owners with training guides, health tips, and nutrition advice.
- Implemented user authentication (JWT) with registration and login system, enabling users to bookmark content and track learning progress.
- Built RESTful APIs using Node.js + Express for handling user data and learning content.
- Integrated MongoDB to store user profiles, pet training modules, and progress history.
- Used Axios for frontend-backend communication and Redux Toolkit for managing application state.

## **Car Rental Management** | *HTML, CSS, JavaScript,PHP*

Sept 2023

- Developed a web application for managing car rentals with PHP as the backend and HTML/CSS/JavaScript for frontend design
- Designed a dynamic search and filter system for customers to browse available cars based on location, type, and rental dates
- Created a database schema using MySQL to store rental transactions, customer profiles, and car fleet details

## CERTIFICATES

---

Artificial Intelligence Fundamentals - **IBM SkillsBuild**

Architecting Solutions on AWS - **Coursera**

JavaScript - **Scaler**

Python - **Udemy**
